PROFESSIONAL SUMMARY

Data Science undergraduate (CGPA 9.5) with hands-on experience in data analysis and forensic technology through a Deloitte job simulation, and a strong portfolio of analytics dashboards built using Python, SQL, Tableau, and Power BI. Proven ability to transform large datasets into actionable business insights through KPI-driven visualizations and funnel analysis. Seeking a Data Analyst role to apply strong data wrangling, storytelling, and dashboard development skills to support data-informed decision-making.

EXPERIENCE

Data Analytics Job Simulation May 2025 – Jun 2026

Deloitte | via Forage (Virtual, Self-paced)

- Completed a virtual job simulation programme offered by Deloitte through Forage, covering practical tasks in data analysis and forensic technology.
- Applied structured data analysis techniques to business-style scenarios, practising skills in identifying patterns, interpreting datasets, and forming evidence-based conclusions.
- Gained exposure to forensic technology workflows, including data examination and analytical reporting in a professional context.

PROJECTS

Netflix Streaming Analytics Dashboard Python · Pandas · SQL · Streamlit

- Analyzed 8,800+ Netflix titles across 50+ genres using Python and Pandas, identifying content distribution trends and release-year patterns to support strategic content planning.
- Built an interactive Streamlit dashboard featuring 5 KPIs including content growth rate, genre share, and rating distribution, enabling non-technical stakeholders to explore insights independently.

Global E-Commerce Sales Performance Dashboard Tableau · Power BI · Business Intelligence

- Designed a Tableau dashboard analyzing 50,000+ transaction records across product categories and regions, surfacing top-performing products and seasonal revenue trends to guide sales strategy.
- Developed 10+ KPI visualizations covering revenue by region, category margin, and year-over-year growth, consolidating data from multiple sources into a single decision-support view.

FunnelFlux – Marketing Analytics Dashboard Python · Streamlit · Data Analytics

- Analyzed customer conversion funnel across 5 stages, pinpointing the drop-off stage with the highest abandonment rate to guide marketing budget reallocation decisions.
- Delivered 4 interactive charts including conversion rate by stage, cohort drop-off trends, and traffic-source breakdown, enabling marketing teams to monitor campaign performance in real time.

Drone Simulator HTML · CSS · JavaScript

- Developed a browser-based interactive drone simulation with 6 real-time control features including directional movement, altitude adjustment, and rotation using vanilla JavaScript.
- Implemented a responsive UI with dynamic controls, ensuring consistent functionality across desktop and mobile browsers.

EDUCATION

B.Tech – Computer Science (Data Science) 2022 – Present

Vignan Institute of Technology and Sciences, Hyderabad | CGPA: 9.5 / 10

Intermediate (MPC) 2022

Narayana Junior College | 96.8%

SSC 2020

Narayana High School | CGPA: 10 / 10

SKILLS

Languages & Querying : Python, SQL, Java, C,C++

Analytics & BI Tools : Tableau, Power BI, Streamlit, MS Excel

Data Skills : KPI Development, Data Visualization, Dashboard Design

Databases : MySQL, DBMS

Web : HTML, CSS, JavaScript

Soft Skills : Analytical Thinking, Data Storytelling, Cross-functional Communication, Attention to Detail

CERTIFICATIONS

- Data Analytics Job Simulation – Deloitte (Forage) | 2026
- Python for Data Science – NPTEL / IIT Madras | 2025
- Programming in Java – NPTEL / IIT Kharagpur | 2025
- Data Visualization with Power BI – Great Learning | 2024
- Front-End Development (HTML) – Great Learning | 2024
- C & C++ Programming – PR Softwares | 2023

ACADEMIC ACTIVITIES

- Advanced to the college-level finals of Smart India Hackathon 2024, collaborating in a team to design and present a technology solution within a competitive time constraint.
- Completed a hands-on Machine Learning workshop covering supervised learning algorithms, model evaluation techniques, and real-world dataset preprocessing.
- Delivered technical presentations on core subjects including DBMS and Data Structures to faculty and peers, strengthening ability to communicate complex topics clearly.
